THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME L

January to June, 1934

Head Office:
49, Wellington Street, London, W.C.2

XUM

Index to Volume L

SUBJECT INDEX

A

Addition of Non-Ferrous Metals to Cast Iron, 21, 73.
Albanoid, The Casting of, 262.
Alloy Cast Iron and High-Duty Cast Iron in 1933, 39.
Alloying and Heat-Treatment, Production of Specially Hard Cast Irons by, 237, 350.
Alloys, Elastic Properties of Cast Aluminium, 276.
Alloys, Eutectic Temperature of Iron-Carbon Alloys, 186.
Alloys, Heat- and Acid-Resisting, 26.
Alloys in the Iron Foundry, 329.
Alternating Current Supply, New Electromagnetic Vibrating Screens for, 77.
Aluminium Alloys, Elastic Properties of Cast, 276.
Aluminium Foundry Industry, 41.
American Foundry Industry in 1933, 54.
Antimony upon Cast Iron, Effect of Arsenic and, 259.
Arsenic and Antimony upon Cast Iron, Effect, 259.
Austrian Foundry Trade, 59.

B

Blast-Furnace Tuyeres, 169.
Brass for the Establishment of a Basic Classification of Non-Ferrous Ingot Metals for Specification Purposes, Studies on Cast Red, 359, 395, 414.
British Industries Fair, 133.
British Non-Ferrous Metals Research Association, 358.
Bronzes, Foundry—No. I, 107.
Bronzes, Foundry—No. II, 116.
Bronzes, Foundry—No. III, 186.
Bronzes, Studies in Cast, 362, 414.

C

Cast Bronzes, Studies in, 362, 414.
Cast Iron, Addition of Non-Ferrous Metals to, 21, 73.
Cast Iron at Elevated Temperature, Impact Resistance of, 179.
Cast Iron, Effect of Arsenic and Antimony upon, 259.
Cast Iron, Effect of Mould Condition upon, 195.
Cast Iron for Foundry Purposes, Chromium Additions to, 117.
Cast Iron for Foundry Purposes, the Addition of Molybdenum to, 317.
Cast Iron, Formation of Graphite Nuclei in, 384.
Cast Iron, Potentialities of, 209, 227, 332.
Cast-Iron Scrap in the Open-Hearth Furnace, 362.
Cast Iron, Specially Hard, 350.
Cast Iron Sub-Committee of the Technical Committee, Report of the, 407.
Cast Iron, Sulphur Content of, 208.
Cast Iron, Thermal and Electrical Properties of, 283.
Cast Irons by Alloying and Heat-Treatment, Production of Specially Hard, 237, 350.
Cast Red Brass for the Establishment of a Basic Classification of Non-Ferrous Ingot Metals for Specification Purposes, Studies on, 359, 395, 414.
Casting, Continuous, 241.
Castings, Electro-Plating, 183, 200.
Castings, Oil-Engine, 342.
Castings, Porosity in Non-Ferrous Metal Castings, 175.
Castings, Some Notes on the Production of Important, 304.
Centrifugally-Cast Pipe, 158.
Ceramic Society, Spring Meeting, 366.
Chaplets, Use and Abuse of, 164.
Chromium Additions to Cast Iron for Foundry Purposes, 117.
Commercial Moulding Sand Control for the Modern Ironfounder (Discussion), 5, 135.
Continuous Casting, 241.
Contracting Spiral of World Trade, 333.
Copper Outlook Brighter, 168.
Copper Prospects, 328.

Correspondence:—

A Manual of Foundry Practice, 328.
Action of Coal Dust on Bond, 174.
B.I.F. Admission Charge, 112.
B.I.F. Patents, 98.
British Students to Tour Belgium, 222.
Coal Dust, 232.
Corner Effect, 70.
Cupola Practice, 192, 222, 256, 296, 356, 388.
Dearth of Foundry Students, 82.
"Fettling" the Cupola, 372, 388.
Malleable Specifications, 362.
Manchester Conference, 372.
Modern Iron Foundry Practice, 250.
Molybdenum in Cast Iron, 328.
Porosity in Non-Ferrous Metal Castings, 266.
Production Costs and Selling Prices, 328, 342.
Propaganda for High-Duty Cast Iron, 256.
Quantity Production and Steel Castings, 20.
Scotland's Largest Horizontal Diesel Engine, 82.
Squatting of Oil-Sand Cores, 208.
Steel Castings, 144.
Synthetic Sands, 208.
Theory and Practice, 2, 20.
Training of Foundrymen, 70.
Water Core Binders and Coal Dust, 250, 266.
What is a Metallurgist? 20.
X-Ray Testing, 406.

Creep of Metals Using a Modified Rohn Test, 213.
Cupola Linings, 102.
Cupola Practice, Modern, 99.
Cupola Practice, Refractories in American, 196.
Cylinder Cast Irons, Wear Resistance of, 138.
Czecho-Slovakian Foundry Industry in 1933, 55.

D

Design and the Foundry, 75.
Design, Patternmaking and Moulding, 267.
Determination of Silicon in Steels, 4.
Development, Foundry, 37.
Developments in Foundry Refractories, 71.
Drum, New Type of Magnetic, 214.

E

Education of Foundrymen, 85.
Elastic Properties of Cast Aluminium Alloys, 276.
Electric Steel Making, Some Points in, 83.
Electrochemical Pickling Process, 203.
Electromagnetic Vibrating Screens for Alternating-Current Supply, New, 77.
Electro-Plating Castings, 183, 200.
Electrode for Welding Cast Iron, 282.
Eleventh International Acetylene Congress, Rome, June, 1934, 400.
Enamelling Department, the Mechanised Foundry of the Sterling Manufacturing Company, with Special Reference to, 313.
Enamelling, Light Castings for, 148.
Equipment Industry in 1933, Foundry, 38.
Eutectic Temperature of Iron-Carbon Alloys, 186.

F

Formation of Graphite Nuclei in Cast Iron, 384.
Foundry in a Garden, A, 282.
Foundry Industry Month by Month, 58.
Foundry Practice, Modern, 215.
Foundry Problem, A, 261.
Foundry Selling Practice, 78, 122, 260.
Foundry Trades' Equipment and Supplies Association, Annual Meeting, 178.
French Foundry Industry, 46.
Furnaces, Induction Melting, 132.

G

German Foundry Industry in 1933, 56.
Graphitisation in Cast Iron, Effect of Non-Metallic Nuclei upon the, 335.
Grey-Iron Foundry Industry, Trade Conditions in 1933, 45.

H

Hardness Tests, 204.
Heat- and Acid-Resisting Alloys, 26.
Heat-Treatment, Production of Specially Hard Cast Irons by Alloying and, 237, 350.
High-Duty Cast Iron in 1933, Alloy Cast Iron and, 39.
High-Frequency Electric-Furnace Production, 169.
High-Frequency Electric Steel-Melting Plant, Installation at Stocksbridge, 273.
How Sand Control Pays Dividends, 5.

I

Iamzite, 323.
Impact Resistance of Cast Iron at Elevated Temperature, 179.
Induction Melting Furnaces, 132.

Institute of British Foundrymen:—

Annual Banquet and Dance, 389.
Annual Conference at Manchester, 373.
Annual Conference at Manchester, Programme, 271.
Birmingham, Coventry and West Midlands Branch, Annual Dinner, 86.
Birmingham, Coventry and West Midlands Branch, Annual Meeting, 336.
East Midlands Branch, Annual Dinner, 204.
East Midlands Branch, Election of New Officers, 230.

TJ 670.5 .F6 v.50

East Midlands Bra ures, 29, 121.
Institute Elects Ne bers, 88, 287.
Institute of British ndrymen in 1933, Work of, 43.
Lancashire Branch, A nual Dinner, 119.
Lancashire Branch, Annual Meeting, 319.
London Branch, Joint Meeting with the Electro-Depositors' Technical Society, 183.
Middlesbrough Branch, Annual Meeting, 272.
Newcastle and District Branch, Presidential Address, 30.
Scottish Branch, Annual Meeting, 324.
Sheffield Branch, Annual Dinner, 116.
Sheffield Branch, Annual Meeting, 278.
Sheffield Branch, Lecture, 26.
West Riding of Yorkshire Branch, Annual Dinner, 86.
West Riding of Yorkshire Branch, Annual Meeting, 323.
West Riding of Yorkshire Branch, Lecture, 180.
Institute of Metals, Annual General Meeting, 161.
Institute of Vitreous Enamellers, Appointment of Officers and Statement of Objects, 234.
International Foundry Congress and Exhibition, Philadelphia, U.S.A., Fifth, 270.
Iron and Steel Institute, Annual Meeting, 357.
Iron and Steel Institute, Programme of Annual Meeting, 270.
Iron Foundry, Alloys in the, 329.
Iron Foundry Practice, Modern, 165.
Italian Foundry Industry in 1933, 46.

L

Law and Practice Relating to Trade Marks, 302.
Lead, Poor Outlook for, 108.
Leaders:—
A Distinguished Career, 191.
A New Society, 157.
A Problem to be Resolved, 221.
A Promise Fulfilled, 295.
Art and Industry, 69.
Bouquets Instead of Brickbats, 81.
British Industries Fair, 128.
Cast Iron Progress, 112.
Castings and Wastage, 112.
Castings in the Chemical Industry, 341.
Cheap Ticket Reflections, 281.
Consumer Research, 173.
Corrosion, 405.
Enamelling Cast Iron, 191
Forthcoming Conferences, 266.
Foundry Propaganda, 69.
Impact Testing, 261.
Ingot Moulds, 249.
Iron and Steel Institute Meeting, 355.
Malleable Specifications—I, 207.
Malleable Specifications—II, 234.
Manchester Conference, 371.
More Haste Less Speed, 355.
Moulding Machine Production, 1.
North and South, 311.
Physical Data, 281.
Practical Papers, 295.
Registering Progress, 173.
Review of the Foundry Industry, 33.
Rubber as a Competitor, 19.
Sand Control, 97.
Short-Paper Competitions—An Innovation, 234
Scientific Instruments, 97.
Sheltered and Unsheltered Wage Rates, 405.
Silica Slime, 327.
Standardisation of Castings, 207.
Steel Again, 371.
Testing by X-Rays, 387.
The Centre of Gravity of Industry, 327.
The Coping Stone, 387.
The Flood of Literature, 81.
The Foundry Degree Course, 143.
The Philadelphia Congress, 311.
The Proposed Birmingham School, 221.
The Reorganisation of the Steel Industry, 19.
The Reorganisation Scheme, 143.
The Use of Cast Iron, 157.
To-day's Decision, 128.
Welded Structures, 341.
What is a Metallurgist? 1, 250.
Light Castings for Enamelling, 148.
Light-Castings Industry in 1933, 52.

M

Magnetic Drum, New Type of, 214.
Malleable Foundry Industry in 1933, British, 36.
Malleable-Iron Castings, 112.
Martensite, Formation of, 182.
Mechanical Properties of Steel at Low Temperatures, 306.
Mechanisation, Foundry, 7.
Mechanisation of Foundries, 51.
Mechanisation, Railway Foundry, 47.
Metallurgists' Outlook on Modern Foundry Production, 11, 137.
Modern Foundry Practice, 215.
Molybdenum and Cast Iron for Foundry Purposes, The Addition of, 317.
Moulding Design, Patternmaking and, 267.
Moulding-Machine Practice, 180.
Moulding, Plastic, 347.
Moulding-Sand Control for the Modern Ironfounder, Commercial, (Discussion), 5, 135.
Moulding-Sand Practice, Recent Developments in British Synthetic, 391, 410.
Moulding Sands, A New Method for Preparing, 335.

N

National Federation of Iron and Steel Manufacturers, 152.
New Etching Reagent for the Phosphide Eutectic in Cast Iron, 107.
Nickel Industry in 1933, 64.
Nickel Prospects, Favourable, 213.
Non-Ferrous Founding, Some Aspects of, 193, 211.
Non-Ferrous Foundry in 1933, 53.
Non-Ferrous Foundry Problems, 121.
Non-Ferrous Ingot Metals for Specification Purposes, Studies on Cast Red Brass for the Establishment of a Basic Classification of, 359, 395, 414.
Non-Ferrous Metal Castings, Porosity in, 175.
Non-Ferrous Metals in 1933, 57.
Non-Ferrous Metals to Cast Iron, Addition of, 21, 73.
Non-Magnetic Nuclei upon the Graphitisation in Cast Iron, Effect of, 335.

O

Oil-Engine Castings, 342.
Open-Hearth Furnace, Cast-Iron Scrap in the, 362.

P

Patternmakers' Association, The History of the United, 242.
Patternmaking and Moulding Design, 267.
Patternmakers' Foundry Sense, 89, 163.
Petrographic Methods in Slag Examination, 302.
Photomicrographs and their Interpretation, 29.
Pickling Process, Electrochemical, 203.
Pig-Iron Industry in 1933, Foundry, 62.
Pig-irons and their Slags, Reactions between, 290.
Porosity in Non-Ferrous Metal Castings, 175.
Patternmaking, 129, 145.
Plastic Moulding, 347.
Potentialities of Cast Iron, 209, 227, 332.
Problems in Woodworking Machinery Castings, 113.
Producer-Gas Practice, Modern, 108.
Production Costs and Selling Prices, 297.
Production, Metallurgists' Outlook on Modern Foundry, 11, 137.
Production of Specially Hard Cast Irons by Alloying and Heat-Treatment, 237, 350.
Projected British Foundry School, 197, 229.
Proposed Degree Course in Foundry Science, 133.

R

Railway Foundry Mechanisation, 47.
Refractories, Developments in Foundry, 71.
Refractories in 1933, 40.
Refractories in American Cupola Practice, 196.
Report of the Work of the Cast Iron Sub-Committee of the Technical Committee, 407.
Research in 1933, Foundry, 49.
Road-Sett Foundry of the Stanton Ironworks Company, Limited, 257.

S

Saint Eloy, The Story of, 312.
Sand Control, 118.
Sand Control for the Modern Ironfounder, Commercial Moulding (Discussion), 5, 135.
Sand Practice, Recent Developments in British Synthetic Moulding, 391, 410.
Sand Testing Report, An American View of the British, 244.
School, Projected British, 197, 229.
Scrap Scarcity Continues, 261.
Selling Prices, Production Cost and, 297.
Sheepbridge Coal & Iron Company, Limited, Works of the, 103.
Silicon in Steels, Determination of, 4.
Slag Examination, Petrographic Methods in, 302.
Slags, Reactions between Pig-irons and Their, 290.
Sodium Carbonate in Iron and Steel Works, The Use of, 223.
Spelter Outlook, Uncertain, 275.
Stanton Ironworks, Company, Limited, Road-Sett Foundry of the, 257.
Statistical Method in the Foundry, 203.
Steel at Low Temperature, Mechanical Properties of, 306.
Steel Castings Report (Discussion), 288, 299.
Steel Castings with Special Reference to the Tropenas Process, 343.
Steel Foundry Industry in 1933, British, 35.
Steelmaking, Some Points in Electric, 83.
Steel Manufacture in the Transvaal, 134.
Steel-Melting Plant, High-Frequency Electric, Installation at Stocksbridge, 273.
Steels in Marine Engineering Service, 76.
Sterling Manufacturing Company, with Special Reference to the Enamelling Department, The Mechanised Foundry of, 313.
Stewarts and Lloyds' New Works, 306.
Studies on Cast Red Brass for the Establishment of a Basic Classification of Non-Ferrous Ingot Metals for Specification Purposes, 359, 395, 414.
Sulphur Content of Cast Iron, 208.
Synthetic Moulding-Sand Practice, Recent Developments in British, 391, 410.

T

Technical Committee, Report of the Work of the Cast Iron Sub-Committee of the, 407.
Temperature Control, 216.
Thermal and Electrical Properties of Cast Iron, 283.
Tin Position, 406.
Tin Position, Dangerous, 205.
Tin Situation, Difficult, 312.
Tinned Scrap in the Blast-Furnace Charge, 101.
Trade Marks, Law and Practice Relating to, 302.
Training of Foundrymen, 23.
Tropenas Process, Steel Castings with Special Reference to, 343.
Tuyeres, Blast-Furnace, 169.
